Nitrogen fertilizer solution containing urea formaldehyde for foliar application

- 60% slow release nitrogen
 - Very low salt index and low EC value do not cause leaf burn.
 - If applied to the leaves, it is extremely resistant to being washed away by rain.
 - Combines rapid availability with the long-term effect of nitrogen.
 - Easy foliar uptake and reduced gaseous nitrogen losses
- Highly effective nitrogen source for.

Crop	Application	Soil Appl.	Foliar
GREENHOUSE AND OPEN FIELD VEGETABLES, TOMATO, EGGPLANT, PEPPER, BEANS, SALAD ETC.	With the start of development 2-3 application	2-4 lt/da	200-400 ml/da
ALL FRUIT TREES	With the start of development 2-3 application	2-4 lt/da	200-400 ml/da
SEEDBED	2 application during irrigation of seedlings	2-4 lt/da	200-400 ml/da
TUBEROUS PLANTS SUGAR BEET, POTATO, ONION, TURNIP, CARROT, GARLIC ETC.	With the start of development 2-3 application	2-4 lt/da	200-400 ml/da
FIELD CROPS (WHEAT, CORN, BARLEY, TOBACCO, SUNFLOWER, PADDY, COTTON ETC.)	With the start of development 2-3 application	2-4 lt/da	200-400 ml/da
CUT FLOWERS	With the start of development 2-3 application	2-4 lt/da	200-400 ml/da
